

Also known as

GSP Agar

Specification

Semiselective and differential solid medium for the isolation of *Pseudomonas-Aeromonas* from very contaminated samples.

Formula * in g/L

Sodium L(+)Glutamate.....	10.00
Soluble starch.....	20.00
Monopotassium phosphate.....	2.00
Magnesium sulfate.....	0.50
Phenol red.....	0.36
Agar.....	15.00

Final pH 7,2 ±0,2 at 25 °C

* Adjusted and /or supplemented as required to meet performance criteria

Directions

Suspend 47.86 g of powder in 1 L of distilled water and bring to the boil. Dispense in flasks and sterilize by autoclaving at 121°C for 15 minutes. Cool to 45-50°C and add 100.000 I.U. of sodium G penicillin and 0,01g of pimarcine per litre. Pour into sterile plates.

Technique

Antibiotics are added to this medium after sterilization and cooling to 45-50°C, in such a way that final concentrations in the medium are 100.000 IU/ L of penicillin G and 0.01 g/L of piramicine (it may be replaced by amphotericin or nystatin). After solidification in plates, medium may be used by surface inoculation or by leaving for the membrane filters. *Aeromonas* colonies turn to yellow, and *Pseudomonas* ones do not. The incubation is performed at room temperature (25- 30°C) for 3 days. Sometimes, enterobacteria may also grow but very slowly with pinpoint colonies.

Quality control

Incubation temperature: 28 ±2 °C

Incubation time: 48-72 h

Inoculum: Practical range 100 ± 20 CFU. Min. 50 CFU (Productivity) / 10⁴-10⁶ CFU (Selectivity) according to ISO 11133:2014/Amd 1:2018. MF methods.

Microorganism

<i>Aeromonas hydrophila</i> ATCC® 7966	Growth	Remarks
<i>Pseudomonas aeruginosa</i> ATCC® 27853	Productivity > 0.50	Starch hydr. (+). Yellow medium.
<i>Pseudomonas aeruginosa</i> ATCC® 9027	Productivity > 0.50	Starch hydr. (-). Red-violet medium.
<i>Escherichia coli</i> ATCC® 25922	Productivity > 0.50	Starch hydr. (-). Red-violet medium.
<i>Staphylococcus aureus</i> ATCC® 25923	Inhibited	-

Growth

Remarks

Storage

For laboratory use only. Keep tightly closed, away from bright light, in a cool dry place (+4 °C to 30 °C).
